

Wood is an very important natural resource! We use it in many different ways:

*including MDF and fibre-board, which look like this:

MDF

fibre-board

They are made from fibres of shredded wood, pressed and glued together. Lots of furniture is made from them.

Design a poster to show how important wood is, and the many ways we use it. Use the checklists below to help you plan and evaluate your poster.

Everyone should...

- ...show lots of ways that timber, wood pulp and rubber are used.
- ...explain why wood is so important.
- ...describe some places where wood comes from.
- ...make it visual! Use colour, eye-catching text, pictures or diagrams.

Some people could...

- ...take photos or draw sketches of products made from wood.
- ...include a labelled map showing some places where wood is produced.
- ...describe some ways we could use less wood products.
- ...describe some ways we could re-use or recycle wood products.

A few people might...

- ...use books or the internet to find facts and statistics.
- ...explain some environmental problems associated with using wood products.
